

ERRATA

In the December 2019 issue of the Telfor Journal, there is a technical error in the paper “System for Measuring Finger Force Profiles for Dexterity Assessment” by Milica M. Badža, Marija M. Novičić, Milica Đurić-Jovičić, Milica M. Janković, and Mirjana B. Popović [1]. Fig 7 [1], showing the sensitivity of the strain gage force sensor to the pressure point, is not presented as it should be. The correct versions of Fig. 7 is as follows:

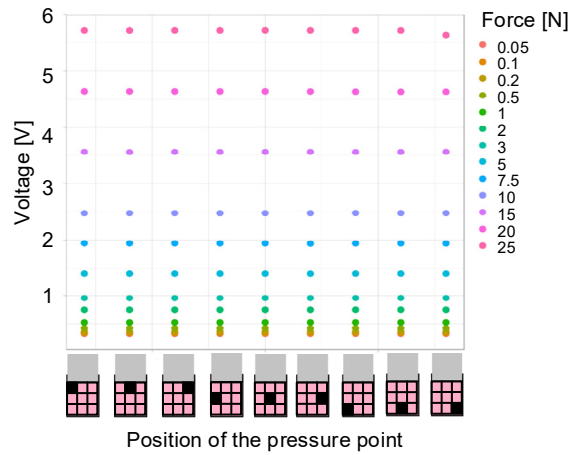

Fig. 7. The sensitivity of the strain gage force sensor to the pressure point. Finger position on the sensor is presented along the x -axis.

We apologize for any confusion this may have caused.
