

EDITORIAL

TELFOR is the abbreviation for the Telecommunications Forum, a long-lasting scientific, engineering and professional event that started in 1993 in Belgrade, Serbia. This year in November, TELFOR will be organized for the 31st time, what is quite an impressive result for any annual scientific conference. Initial idea was to establish a national scientific conference in the area of Telecommunications. Over the years, that idea has evolved in such a way that today TELFOR is a huge regional international conference in Telecommunications and Information Technologies, having also its several other parallel tracks, like special presentations of companies, presentations and papers of invited experts, exhibition of telecommunications hardware, software, systems and services, tutorials, seminars, round tables, etc. During TELFOR's existence several thousand of scientific papers were presented and published, quite a number of them being of a considerable quality and with important results. Having such resources at disposal, establishing a scientific journal, the TELFOR Journal, was a very natural next step for several reasons:

- Authors with favorable TELFOR reviewers' assessments would have an additional opportunity to improve and expand their initial ideas;
- Editorial board would have a wide set of prospective invited authors;
- After some time of existence, TELFOR Journal attracts independent authors to submit their papers to be considered for publishing.

The history of TELFOR Journal is now fifteen years long. The first volume consisting of two issues was published during the TELFOR 2009 conference in November 2009. Apart from authors from Serbia, authors from many other European and non-European countries were also represented. After fifteen years one can easily conclude that TELFOR Journal is already a recognizable scientific publication in the region of South-East Europe. The large spectrum of TELFOR Journal topics accounts for the rapid convergence through telecommunications towards the information and knowledge-based society. The Journal provides a medium for exchanging research results and technological achievements accomplished by the scientific community from academia and industry. TELFOR Journal is indexed in several well recognized index bases: Directory of Open Access Journals (DOAJ), Google Scholar, SCOPUS (from 2016), National Library of Serbia Repository and Serbian Citation Index (Sci Index). The TELFOR Journal is published in electronic and printed versions, minimally with two issues per year. The Telfor Journal originated from the IEEE sponsored conference and follows the IEEE tradition in terms of procedures and quality of papers. The TELFOR Journal is an OPEN ACCESS journal with no charge for authors and readers.

The TELFOR Journal is an OPEN ACCESS journal with no charge for authors and readers.

Editor-in-Chief

Prof. dr Aleksandar Nešković
