

## EDITORIAL

TELFOR is the abbreviation for the Telecommunications Forum, a long lasting scientific, engineering and professional event that started in 1993 in Belgrade, Serbia. TELFOR is being organized this 2016<sup>th</sup> year by twenty-fourth time, what is quite an impressive result for any yearly scientific conference. Initial idea was to establish a national scientific conference in Telecommunications. During the years, that idea evolved in such a way that today TELFOR is a huge regional international conference in Telecommunications and Information Technologies, having also its several other parallel tracks, like special presentations of companies, presentations and papers of invited experts, seminars, tutorials, round tables, etc. During TELFOR's existence several thousands of scientific papers were presented and published, quite a number of them being with a considerable quality and important results. Having such resources at disposal, establishing a scientific journal, the TELFOR Journal, was a very natural next step for several reasons:

- Authors with favorable TELFOR reviewers' assessments would have additional chances to improve and expand their initial ideas;
- Editorial board would have a wide set of prospective invited authors;
- After some time of existence, one could expect that TELFOR Journal would attract independent authors to submit their papers to be considered for publishing.

The history of TELFOR Journal is eight years long. The first volume consisting of two issues was published during the TELFOR 2009 conference in November 2009. That first volume of the Journal was intended to present a selection of the improved and expanded versions of the best scientific papers presented at Telecommunications Forum 2008.

The second volume of the TELFOR Journal, again with two issues, was electronically published before the TELFOR 2010 conference, in November 2010. Printed copies were realized slightly later.

The third, fourth, fifth, sixth and seventh volume of the TELFOR Journal, with both electronic and printed versions, were published before the TELFOR 2011, TELFOR 2012, TELFOR 2013, TELFOR 2014 and 2015 conferences, respectively. Printed copies were realized with significantly improved color quality and increased number of copies, depending on our sponsors support.

This is the eighth volume, based on the selected, expanded and improved results from the TELFOR 2015 conference.

After eight years of existence one can easily conclude that TELFOR Journal is already a recognizable scientific publication in the region of South-East Europe. According to Serbian state and civil scientific authorities, TELFOR Journal got in 2014 a considerable better formal recognition. The impressions of the scientific and research community were positive, both with respect to the Journal scientific quality and the very nice design. TELFOR Journal is indexed in **Serbian Citation Index** and **Directory of Open Axes Journals DOAJ**. **Recently, the Journal was accepted for inclusion in SCOPUS.**

**The TELFOR Journal is an OPEN ACCESS journal with no charge for authors and readers.**

The TELFOR Journal is published in the English language, with both electronic and printed versions, minimally with the two issues per year. It is an IEEE co-supported publication, following all the IEEE rules, procedures, and consequently the scientific quality.

The large spectrum of TELFOR Journal topics accounts for the rapid convergence through telecommunications towards the information and knowledge society. The Journal provides a medium for exchanging research results and technological achievements accomplished by the scientific community from academia and industry.

Editor-in-Chief  
Prof. Dr Đorđe Paunović
